GENERAL MOTORS, CHRYLSEY & FORD REAR WHEEL BEARING REPAIR KITS

APPLICATIONS

B350

'C' Axle Size 1.399 - 10
Bolt
Light Duty

The rollers of the old bearing wear a groove into the axle. The B350 or B351 will roll on the unworn part of the axle. They are prelubricated with high temperature lithium grease, and have two seals completely sealing the bearing from the differential fluid. Enables use of worn axle shafts.

B351

'P' Axle Size 1.618 Bolt
Heavy Duty

MAKE/MODEL/AXLE TYPE	YEAR	PART#
GM CARS & TRUCKS
